Intellicheck Mobilisa Announces Partnership with Georgia Technology Authority

Port Townsend, WA – March 17, 2009: Intelli-check - Mobilisa, Inc. (NYSE Alternext US: IDN), has partnered with the Georgia Technology Authority (GTA) to provide their advanced patented ID Reading Technology in combination with GTA's "License Match Gold" Product.

Intellicheck Mobilisa's ID Reading Technology automates the process of retrieving information from an ID such as a driver's license. By scanning the barcode on an ID, Intellicheck Mobilisa's technology quickly processes the encoded information to pre-populate forms or applications. This technology not only increases productivity, but also protects against data entry errors and reduces the risk of identity theft.

"License Match Gold" is an online tool offered by the State of Georgia that provides a simple, instant solution to stop anyone using a fraudulent Georgia driver's license or identification card to access services. Businesses can verify driver's license information against the state database to prevent fraud, minimize loss and document verification when anyone presents a Georgia Drivers License.

"We have worked in cooperation with Intellicheck Mobilisa and have found their technology to be fast, safe and secure," said Ivan Sumter, Director, Data Sales for Georgia Technology Authority. "Their level of support and the security they provide with their technology is integral to the success of our "License Match Program"."

Currently targeted primarily towards financial institutions and auto dealerships, this technology partnership applies to numerous Georgia industries looking to prevent fraud and streamline data entry.

Steve Williams, Chief Operating Officer for Intellicheck Mobilisa, stated, "This partnership builds upon our proven ID reading technology and expands the opportunities for companies to utilize GTA's fraud-prevention tool. We are currently working with several organizations to provide this service, to include check cashing facilities and real estate transactions."

About GTA

GTA was established on July 1, 2000, in accordance with Senate Bill 465 of the 2000 Legislative Session.

The Georgia Technology Authority seeks to ensure that the state's IT infrastructure is stable, secure, and well-governed with accessible services for Georgians. GTA specifically Manages the state's IT infrastructure—data center, network and telecommunications services and security.
