

FOR IMMEDIATE RELEASE

INTELLICHECK MOBILISA TO SHOWCASE PRODUCTS AT HITEC 2009

The World's Largest Annual Hospitality Technology Event

Anaheim, CA, June 22-25, 2009

Port Townsend, WA – June 19, 2009: [Intellicheck Mobilisa, Inc.](http://www.icmobil.com) (NYSE Amex: IDN), a global leader in identity and wireless systems, will be showcasing its patented ID-Check technology along with its latest product, ScanINN™, at the HITEC 2009. Billed as the world's largest hospitality technology event, the trade show will take place at the Anaheim Convention Center in Anaheim, California, from June 22-25, 2009.

Intellicheck Mobilisa's ID-Check technology automates the process of retrieving information from an ID such as a driver's license. By scanning an ID card, Intellicheck Mobilisa's technology quickly processes the encoded information to pre-populate forms or applications. This technology not only increases productivity, but also protects against data entry errors and reduces the risk of identity theft.

ScanINN, the company's latest product, uses this patented technology to rapidly and more efficiently automate the registration and reservation process for hotels.

"Our software works with nearly all hotel Property Management Systems or PMS systems," said Intellicheck Mobilisa CEO Dr. Nelson Ludlow. "Our ID-Check technology is in-use at a variety of Fortune 500 retail stores, and we look forward to introducing our products to the hospitality industry."

For more information about Intellicheck Mobilisa's products, please visit www.icmobil.com, or visit us at booth #868. To learn more about HITEC visit: www.hftp.org.

About Intellicheck Mobilisa

Intellicheck Mobilisa is a leading technology company, developing and marketing wireless technology and identity systems for various applications including: mobile and handheld

wireless devices for the government, military and commercial markets. Products include the Defense ID system, an advanced ID card access control product currently protecting over 50 military and federal locations. ID-Check is a technology that instantly reads, analyzes, and verifies encoded data in magnetic stripes and barcodes on government-issue IDs from approximately 60 U.S. and Canadian jurisdictions to determine if the content and format are valid.
